Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

ASSISTANT SECRETARY AND COMMISSIONER OF PATENTS AND
TRADEMARKS
Washington, D.C. 20231

Paper No:20081218
Application No:10/574606
Filing Date: April 5,2006

1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed. It should be brief but technically accurate and descriptive, preferably from two to seven words. See 37 CFR 1.72(a).

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mearns et al (6863161) and Hida et al (JP 11228046).

Mearns teaches in figures 1-2, an elevator telemonitoring system which utilizes a monitoring terminal 8 which transmits data from cameras 3,4,5 to a maintenance center 9 for analysis. The link may consist of telephone or internet connection, col. 4 lines 50-53. The data is transmitted during a test run for the determination of future faults which may be enacted upon.

Mearns et al does not illustrate data transmission based on a current fault detection.

Art Unit: 2837

Hida et al teaches that the use of data collection from cameras and microphones from the inside of an elevator may be transmitted to a remote location and will detect during normal operation and that corrective actions may be sent back to the elevator controller from the remote local. Mearns et al states on col. 2, lines 18-36, that the use of the Hida et al system is known within the art and that Mearns et al is an improvement over the art. Thus to utilize known art within the system of Mearns et al would have been an obvious engineering design choice to one of ordinary skill in the art.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Fukushima et al., Hummert et al., Whynacht et al., Mandel et al., Schneida et al., Harada et al., Kindberg et al. Mandel et al., Schneida et al., Whynacht et al and Yamakawa are cited to illustrate similar elevator telemonitoring systems..

A shortened statutory period for response to this action is set to expire 3 months from the date of this letter.

Failure to respond within the period for response will cause the application to become abandoned. 35 U.S.C. 133

Any inquiry of a **general nature** should be directed to the **Group receptionist whose telephone number is (571) 272-2800.**

Information regarding the STATUS of an application may be obtained from the Patent Application Information Retrieval (PAIR) system.
